

Greenmood

Important care guidelines for your Greenmood installation

To ensure the longevity and appearance of your preserved moss installation, please follow these care and repair steps carefully:

Climate & Temperature:

- We recommend maintaining a humidity level between 40% - 80% to preserve the integrity of the foliage. Excessive humidity can cause the moss and greenery to degrade faster.
- In case of low humidity levels where temperature can not be easily adjusted, we recommend using an air humidifier.
- Ensure the temperature of the space stays in a moderate range—ideally between 60°F to 75°F (15°C to 24°C). Extreme temperatures (both hot and cold) can impact the product's longevity and visual appearance.

Signage Installation:

- We highly recommend installing a "Please Do Not Touch" sign near all Greenmood installations, especially in high-traffic areas. Touching the greenery can damage the delicate foliage and cause irreversible wear over time. Clear signage helps prevent this and extends the life of your installation.

Care & Maintenance:

- Use a feather duster for occasional dusting of foliage, if needed. Avoid using canned air dusters, as they are too aggressive for preserved plants. For moss, a low-suction vacuum can be used to gently remove surface dust.
- Keep a minimum distance of 48 inches from heat-emitting lights.
- LED light fixtures should be mounted at least 24 inches away from the green wall surface.
- Avoid contact with liquids or moisture, as exposure can cause premature color fading or wilting.
- Avoid direct sunlight for long periods as this can cause fading and damage to the natural colors.
- Do not water the greenery. Our preserved moss and plants do not require watering, and moisture can cause deterioration.

By following these simple care instructions, you can ensure that your Greenmood installation maintains its beauty and lasts for many years to come.

Note: While Greenmood products are safe for both pets and people, they are not indestructible. Following these guidelines will help minimize potential issues and ensure your installation remains as beautiful as the day it was first installed.
