B-1020 Brussels

Brussels, 22 September 2023

Statement of the company on methods of preservation of the reindeer moss and foliage that are used in the production of the end products.

Drying/dehumidifying method: Natural - Products exposed to the sun on shelving.

Decontamination method: Natural – Product is washed in concentrated salted water/brine which decontaminates it.

Preservation method: Natural – Product is dipped/washed in all-natural bio glycerin solution.

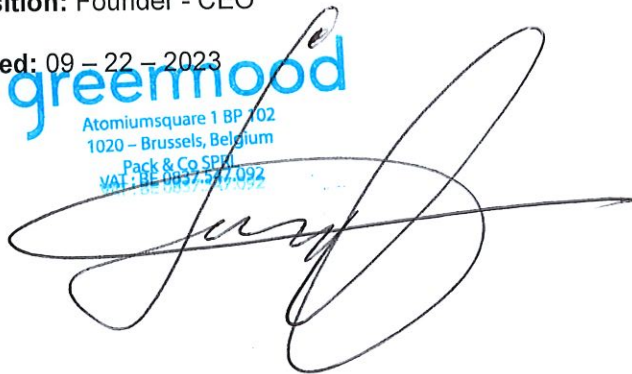

Colorants: Natural – Dyes used to color the product are edible food coloring.

Pack and Co Sprl (alias/doing business as Greenmood) declares that – No toxic or harmful substances are used throughout the whole process right up to the final product.

Signed: Mr. Sadig Alakbarov

Position: Founder - CEO
