Founded in 2014 in Brussels, Belgium, by Sadig Alakbarov, Greenmood designs and manufactures 100% natural acoustic solutions for interiors and workplaces.

By using specially preserved greenery, we create walls and products that reduce noise, elevate aesthetics, and boost productivity – while respecting the environment and supporting sustainability.

Our philosophy goes beyond design: we focus on the emotional and physical impact of interiors when nature is absent. Greenmood was born from one simple idea:

Bring nature indoors, create comfort, and improve well-being with minimal environmental impact.

That's why we carefully select our suppliers and partners, always striving for the greenest solution.

Reconnecting people with nature

Health, focus, balance

Biophilic design for better living.

100% natural materials,
certified & sustainable

SUSTAINABILITY FIRST

Acoustic, decorative & functional products with **zero maintenance**

ABOUT

COMPANY PRESENTATION
