Mario Planters

Planters carved from
sustainable cork

Mario Planters

Elevate your plant aesthetic

Inspired by bold geometric simplicity, the Mario Planter is sculpted from expanded cork blocks. Lightweight yet durable, it enhances interiors with the warm tones of cork and its natural sound-absorbing properties. Available in two sizes, it blends seamlessly into any décor..

Design by: Alain Gilles

Specifications

- Available in 2 sizes
- Body made of expanded cork with acoustic properties
- Renewable, recyclable & maintenance-free material

Materials

Expanded cork

Origin	Europe
Durability	Stable, waterproof, recyclable & reusable – no additives needed
Health	Non-toxic, non-allergen, no emissions under fire
Lifespan	Practically unlimited without loss of properties
Mechanical	High density(100–120 kg/m³) – excellent stability & resistance
Sound absorption	NRC 0.35 (ISO 11654:1997)

Expanded cork is a by-product of the cork industry, made by steam-heating cork granules from the upper bark of cork oak trees.

This process naturally binds the material **without additives**, creating **lightweight blocks** with **excellent acoustic properties**.
