## Lush, layered & organic greenery

Forest compositions combine a flat moss base with layers of preserved foliage to recreate the richness of nature indoors. Each design is unique, offering depth, texture and acoustic comfort while maintaining the calming presence of real plants. Made from 100% natural species preserved at their peak, Forest panels stay vibrant for years without watering, sunlight or maintenance.

## Specifications

---

**Sound absorption**

Acoustic comfort may vary depending on density and layout.

**Maintenance free**

No watering, no sunlight or artificial light, no pruning or trimming required

**Conditions of use**

Indoor use only. Keep away from sunlight, water, heat and physical contact  
Recommended humidity: 40% to 80%

**Life span**

Maintains its natural form, color and texture for up to 7 years

**Natural & Safe**

Harvested in Europe & Africa · Non-toxic · Non-allergen

**Gross weight**

± 4 kg/m<sup>2</sup> (8.8 lbs/sq.ft) excluding support

## Preservation process

---

Fresh foliage is carefully harvested and pre-selected for quality, then placed in chambers where it absorbs a bio-based glycerin and natural colorant formula under controlled conditions. The process is non-toxic and eco-friendly, eliminating any insects while stabilizing the plants. After 5 to 10 days, the foliage is dried and undergoes a final selection to ensure only the highest-quality pieces are used.

## Designing process

---

Each Forest composition is unique and handcrafted in our workshop. The design is defined with the client using project references or sketches, then built on a moss-covered backing. Foliage type and density vary depending on availability and may influence pricing. Our Foliage Catalog details the species that can be integrated, subject to season and stock.
