Bring texture, acoustic comfort
& a biophilic touch

Tailored Planter Fillings

Preserved plants, styled your way

Greenmood's tailored planter fillings are handcrafted compositions of preserved plants and natural elements, designed to bring lasting greenery to lobbies, offices and retail spaces. Each arrangement is unique, offering texture, depth and biophilic appeal while requiring no watering, sunlight or maintenance.

Specifications

Maintenance free

No watering, no sunlight or artificial light, no pruning or trimming required

Conditions of use

Indoor use only. Keep away from sunlight, water, heat and physical contact
Recommended humidity: 20% to 80%

Life span

Maintains its natural form, color and texture for up to 7 years

Natural & Safe

Non-toxic · Non-allergen

Preservation process

Stabilized plants are 100% natural plants that undergo a preservation process to maintain their beauty and flexibility for years without watering, light or maintenance.

The technique replaces the plant's natural sap with a solution of vegetable glycerin and natural colorants, under carefully controlled conditions of humidity and temperature. Depending on the species, the process may involve substitution (for foliage and branches) or rehydration (for mosses and lichens).

This eco-friendly method is non-toxic and safe for both people and the environment. Once stabilized, plants retain their vibrant color, softness and natural texture for 5 to 10 years.

Benefits of stabilized plants

- Long-lasting: remain fresh and flexible for years without care.
- Maintenance-free: no watering, sunlight or treatments required.
- Creative freedom: enables green walls, frames, furniture and décor.
- Ecological: higher yield than living plants and no resource use once installed.
