Greenmood

ABOUT US

Founded in 2014 by Sadig Alakbarov, in Belgium, at Greenmood we produce green walls and other 100% natural indoor acoustic solutions to meet the needs of modern workplaces. Using specially preserved greenery, the products reduce noise pollution, add beauty, and boost productivity – all while promoting respect for the natural environment and encouraging sustainability.

In 2019, we expanded by opening offices in New York and Los Angeles. Our North American team consists of experts skilled in managing complex projects and meeting customer needs by offering personalized guidance and selecting the best solutions for each project.
